Product

esco fishery salt is a mined product that was formed around 200 million years ago in the Zechstein sea. The high sodium chloride content of 99 %, the naturally present calcium and the pure white color make esco fishery salt a first-class quality product. For the best possible usage, we can supply esco fishery salt in various grain sizes and preparations, as well as without anti-caking agent.

Product quality

The deposits for esco fishery salt are located in the north part of Germany. They naturally feature a high content of pure white salt crystals. This salt resource, protected at a depth of 400 to 750 meters, is extracted carefully.

At esco, we take the quality and safety of our products very seriously. esco fishery salt exceeds the requirements of the Codex Alimentarius. We guarantee consistently high product quality through continual quality checks and seamless traceability.

Certification

esco production facilities hold valid certification to EN ISO 9001.

Service

We offer our customers first-class service, guaranteed consistently high product quality and a reliable international delivery.
