## Natural feed salt

Pure natural rock salt for animal nutrition

### Product range

Packaging size: 25 kg bag  
(40 x 25 kg per pallet)  
50 kg bag  
(21 x 50 kg per pallet)

Type of packaging: PE bag

Preparation: Bulk:  
Calcium stearate  
(of plant origin)  
In bags:  
Unprepared

Grain sizes: Fine, medium  
and coarse

We would be happy to provide you with a sample.

For more information on this and other products, please do not hesitate to contact us.

### Product quality

esco natural feed salt is made from pure rock salt with a sodium chloride content of 99 %. The following elements are of particular importance for animal nutrition:

Sodium keeps the osmotic pressure in the cells, regulates the water balance and plays an important role in the transfer of nerve impulses and the contraction of muscle fibers. Magnesium is important for muscle function and bone formation. It also activates enzymes that are involved with the metabolism of energy. Calcium is involved in the transfer of nerve impulses and is an essential part of bone formation. It also plays an important role in lactation and is a valuable mineral in milk. Copper, which forms the building block for many proteins and enzymes, is also involved in numerous metabolic processes in animals.

Zinc is used in the metabolism of proteins, carbohydrates and fats and also neurotransmitters. It stabilizes cell membranes and is also part of the hormone insulin.

### Certification

The production facilities of esco – european salt company hold valid certification to EN ISO 9001. Strict compliance with hygiene requirements is confirmed by the certified HACCP system. esco products satisfy the requirements of GMP+ certification, EC regulations 834/2007 and 889/2008 (certified by DE-ÖKO-039) and are recognized as feed products according to the QS standard.
