esco SOLSEL® Salt lick block with apple flavour

Health and performance through self-feeding

Field of application

SOLSEL® salt lick blocks with apple flavour are suitable as single feed for all types of animal. The size and weight of the blocks, however, are designed especially for cattle, horses, sheep, goats, pigs and larger non-domesticated animals.

Product

SOLSEL® salt lick blocks with apple flavour are produced from pure vacuum salt using a special pressing method. The blocks' stability is the result of long-term product development and constant hardness tests. This ensures excellent weather resistance and balanced consumption by the animal.

- ◆ GMP+ certified
- ◆ Recognized by QS
- ◆ With apple flavour
- ◆ Excellent weather resistance
- ◆ Especially suitable for non-domesticated animals

products, please do not hesitate to
contact us.

Product use

Non-domesticated animals need salts and minerals just like domestic and farm animals, and forage for nutrients, resulting in the familiar foraging and bark damage as well as the consumption of de-icing salt in winter in areas with treated roads. SOLSEL® salt lick blocks with apple flavour provide a sensible solution that any hunter would be delighted with. Animals are able to regu-

late their salt balance without damaging vegetation or endangering road users. The extremely pleasant, intense apple flavour also draws non-domesticated animals from far away.

Service

We offer our customers first-class service, guaranteed consistently high product quality and a reliable international delivery.

Certification

esco production facilities hold valid certification to EN ISO 9001. Strict compliance with hygiene requirements is confirmed by the certified HACCP system. esco products satisfy the requirements of GMP+ certification and are recognized for feed products according to the QS standard.
