

esco SOLSEL®

Mineral lick blocks with copper

Health and performance through self-feeding

Field of application

Besides salt (sodium chloride), every animal needs a variety of other important nutrients. Trace elements with proven biochemical importance include zinc, manganese, copper, iron, iodine, cobalt and selenium. Each of these elements play an important role in the animal's organism. Unbalanced nutrition can result in deficiency symptoms.

Product

SOLSEL® mineral lick blocks with copper are produced from pure rock or vacuum salt using a special pressing method. The blocks' stability is the result of long-term product development and constant hardness tests. This ensures excellent weather resistance and balanced consumption by the animal.

- ◆ GMP+ certified
- ◆ Recognized by QS
- ◆ Suitable use in organic farming
- ◆ Available with carrying strap upon request

FEED

esco SOLSEL®

Mineral lick blocks with copper

Health and performance through self-feeding

Product range

Packaging size: Rock salt:
10 kg
(96 x 10 kg per pallet)
Vacuum salt:
10 kg
(120 x 10 kg per pallet;
no compliance with EC
regulations 834/2007
and 889/2008)

Composition: Sodium chloride,
calcium magnesium
carbonate,
trace elements

Ingredients: Sodium 37%,
Calcium 1.6%,
Magnesium 0.6%,
Zinc from zinc oxide
1,000 mg/kg,
Manganese from
manganese-(II)-oxide
1,000 mg/kg, Copper
from copper-(II)-oxide
220 mg/kg, Iodine
from calcium iodate
100 mg/kg, Cobalt
from cobalt-(II)-oxide
20 mg/kg, Selenium
from sodium selenite
20 mg/kg

We would be happy to provide you
with a sample.

products, please do not hesitate to
contact us.

Product use

SOLSEL® mineral lick blocks with
copper are suitable for all types of
animal. The size and weight
of the lick blocks, however, are
designed especially for cattle,
horses, pigs and non-domest-
icated animals. For sheep, we of-
fer SOLSEL® mineral lick blocks
without copper.

An animal's individual mineral
requirements can vary signifi-
cantly, even within groups of
the same type of animal.

SOLSEL® mineral lick blocks are
the ideal way to supplement
basic and concentrated feed to
balance animals' nutritional re-
quirements through the sponta-
neous consumption of minerals
via the lick block.

Certification

esco production facilities hold
valid certification to EN ISO
9001. Strict compliance with
hygiene requirements is con-
firmed by the certified HACCP
system. esco products satisfy the
requirements of GMP+ certifica-
tion, EC regulations 834/2007
and 889/2008 (certified by DE-
ÖKO-039) and are recognized as
feed products according to the
QS standard.

Service

We offer our customers first-
class service, guaranteed con-
sistently high product quality
and a reliable international de-
livery.
