

esco SOLSEL®

Mineral lick block without copper

Health and performance through self-feeding

Field of application

Modern animal husbandry requires the best possible feeding. Healthy and well-performing animals have an advantage in fattening and sport, milk production and breeding.

Product

The SOLSEL® mineral lick blocks without copper have been formulated without copper in order to avoid problems for certain types of animal. Mineral lick blocks without copper have been especially developed for feeding to sheep. However, they are also suitable for cattle, horses, goats, pigs and non-domesticated animals.

- ✓ GMP+
- ✓ Recognized by QS
- ✓ Available with carrying strap
- ✓ Recommended for sheep

- ◆ GMP+ certified
- ◆ Recognized by QS
- ◆ Suitable for use in organic farming
- ◆ Especially suitable for sheep

esco SOLSEL®

Mineral lick block without copper

Health and performance through self-feeding

Product range

Packaging size: Rock salt:
10 kg
(96 x 10 kg per pallet)
Vacuum salt:
10 kg
(120 x 10 kg per pallet)

Composition: Sodium chloride,
calcium magnesium
carbonate,
trace elements

Ingredients: Sodium 37%,
Calcium 1.1%,
Magnesium 0.6%,
Zinc from zinc oxide
1,000 mg/kg,
Manganese from
manganese-(II)-oxide
1,000 mg/kg,
Iron from iron-(II)-
oxide 300 mg/kg,
Iodine from calcium
iodate 100 mg/kg,
Cobalt from
cobalt-(II)-oxide
20 mg/kg,
Selenium from
sodium selenite
20 mg/kg

We would be happy to provide you
with a sample.

Product quality

The salt content of the lick blocks comes from Central European salt deposits renowned for their purity and which were formed more than 200 million years ago as a result of the power of the sun and evaporation of the primordial oceans. The mineral premixes are developed in conjunction with leading animal nutrition experts and are coordinated with the needs of modern animal husbandry. Sheep are only able to excrete copper to a limited degree. That is why this mineral was not included when this lick block was being developed.

Product use

Lick blocks are a simple and inexpensive supplement to feeding. They provide essential sodium chloride as well as other performance-enhancing elements essential for health.

Certification

esco production facilities hold valid certification to EN ISO 9001. Strict compliance with hygiene requirements is confirmed by the certified HACCP system. esco products satisfy the requirements of GMP+ certification, EC regulations 834/2007 and 889/2008 (certified by DE-ÖKO-039 and NL-BIO-01) and are recognized for feed products according to the QS standard.

Service

We offer our customers first-class service, guaranteed consistently high product quality and a reliable international delivery.
