

## esco Feed salt

Pure natural rock salt for animal nutrition

- ✓ GMP+
- ✓ Natural rock salt
- ✓ Various grain sizes

### Field of application

This high-quality rock salt is used and recommended as sodium chloride feed material in animal nutrition.

### Product

esco sodium chloride feed material is a high-quality product mined from our own deposits. Specially-formulated grain sizes can be provided to suit your requirements. They satisfy all the requirements of the EU directives on animal feed and comply with the German Animal Feed Regulation. They are produced using state-of-the-art milling and sieving equipment.

◆ GMP+ certified

◆ Recognized by QS

◆ Quality mined product

# esco Feed salt

Pure natural rock salt for animal nutrition

## Product range

Packaging size: 25 kg bag  
(40 x 25 kg per pallet)  
50 kg bag  
(21 x 50 kg per pallet)  
Big Bag  
Bulk

Type of packaging: PE bag

Preparation: Bulk:  
Calcium stearate  
(of plant origin)  
In Bags:  
Optionally prepared with  
E500/535 (no compliance with  
EC regulations 834/2007 and  
889/2008)

Grain size: Fine, medium  
and coarse  
3,2-1,5 mm  
unprepared

We would be happy to provide you with a sample.

## Product

esco feed salt is a mined product that was formed around 200 million years ago in the Zechstein sea. The high sodium chloride content of 99 % and the pure white colour make esco feed salt a first-class quality product.

## Product quality

Minerals are an essential part of animal nutrition. For more than a century, researchers and animal nutritionists have been endeavouring to supplement the daily feed of farm and non-domesticated animals with added minerals to ensure high performance and a strong physical constitution. The exact mineral requirements of each individual animal are hard to determine. They depend on the varying types of basic and concentrated feed given, the performance

required and on the individual condition of each animal. Sodium keeps the osmotic pressure in the cells in check, regulates the water balance and plays an important role in the transfer of nerve impulses and the contraction of muscle fibres.

## Certification

The production facilities of esco – european salt company hold valid certification to EN ISO 9001. Strict compliance with hygiene requirements is confirmed by the certified HACCP system. esco products satisfy the requirements of GMP+ certification, EC regulations 834/2007 and 889/2008 (certified by DE-ÖKO-039) and are recognized for feed products according to the QS standard.
