

MARINA PLUS

MARINA PLUS tablets produce active chlorine for the disinfection of drinking water and public swimming pools.

Thanks to a high degree of purity and a high stability of the hypochlorous acid produced, this process provides very good disinfection:

- Permanent production of disinfectant
- No transport, handling and storage of dangerous products
- Easy on membranes, ensuring longer service life

Salt tablets for the production of active chlorine which are meant for the disinfection of drinking water and public swimming pools

Marina Plus salt tablets have been specially worked out for the needs of membrane electrolysis:

- Ultra high purity
 - Very low calcium, magnesium and heavy metal content guaranteed
 - Low bromide content guaranteed
 - Total solubility
 - Adapted dimensions, shape and hardness
- allow total and residue-free dissolution

The optimum quality of Marina Plus tablets makes them particularly well suited to the treatment of drinking water and pool water in a wide range of facilities such as hotels, thalassotherapy centres, leisure centres, etc.

Marina Plus tablets are produced from refined food grade salt which complies with the purity criterion of the Codex Alimentarius.

It is important to read the electrolyser operating instructions carefully before using the product.

Bags of 25 kg
